Blockchain training, Dar Blockchain
2024

SKILLS

Kotlin | Jetpack Compose | Flutter | React | TypeScript | NestJS | REST APIs | MVVM | Jira | NoSQL & SQL Databases | Bitbucket | Git | Agile

SPOKEN LANGUAGES

Arabic — Native
English — B2 Level
French — B2 Level
German — A1 Level

PROFESSIONAL EXPERIENCE

Android Developer intern, Value
01/2026 – 08/2026

- Contributed to the development of the myBIAT mobile app on the Backbase platform, using MVVM architecture. Integrated AI-driven features and a voice bot to automate customer service.

Tools: Kotlin, Backbase, TypeScript (NestJS), Bitbucket, Jira

Mobile Developer intern, IGE
07/2025 – 08/2025

- Designed and built a mobile HR app, 100% digitizing processes and eliminating manual HR tasks.

Tools: Flutter, TypeScript (NestJS), MongoDB.

PROJECTS

Health Mobile App (Freelance, UI/UX Design)
10/2025 – 12/2025

- Designed a health app in Figma that lets users find nearby medical facilities, book appointments, and contact doctors directly.

Tools: Figma

Skyward Hybrid App
09/2025 – 11/2025

- Developed *Skyward*, a hybrid web and mobile-responsive application, enabling seamless flight management, airport tracking, car rentals, taxi services, hotel bookings, and budget management within a unified platform.

Tools: React, NextJS, Supabase.

MSAware Mobile App
01/2025 – 05/2025

- Created and published MSAware on the App Store, an AI-powered cross-platform app for people with Multiple Sclerosis. The app manages appointments and medications, predicts MS attacks, and sends reminders through a notification center.

Tools: Flutter, TypeScript (NestJS), MongoDB, Firebase.

Signify Mobile App
11/2024 – 12/2024

- Built an engaging, gamified mobile application from scratch for Android (Kotlin, Jetpack Compose) and iOS (SwiftUI) to teach sign language, improving accessibility and inclusivity for hearing-impaired learners.

Tools: Kotlin, SwiftUI, TypeScript (NestJS), MongoDB, Stripe.
